G5 Cyber Security

Protecting yourself online.

- Are you ok with random people knowing that much about you?
- Are the answers to your security questions also on your social media profiles?
- Are you using the same password on multiple websites?
- Is your password hard to guess?

G5 Cyber Security

Managing your content and others.

- Do you monitor what your friends and colleagues share about you and your family online?
- Do you talk to your immediate family about what is and isn't acceptable to post online? Do you do online searches of yourself to see if there’s any mistakenly exposed content?

G5 Cyber Security

Getting help

- If you are unsure after doing your own research online, check with people who are more experienced.
- Visit the G5 website and submit your query.
